Über die Messe

COMEX is Oman's premier ICT event which takes place annually. Oman's ICT industry is growing at a steady pace and a lot of cooperation is going on in public and private sector. Information Technology is required to develop a secure cyber environment, maintain a uniform flow of information, and increase the revenue of an organization. Oman is offering huge opportunities for IT investment, evident by the initiation of several large projects. The IT market in Oman is expected to grow rapidly, supported by its expanding population, government initiatives, and increasing demand for SMAC(Social, Mobile, Analytics & Cloud) technologies.
