Über die Messe

IDEC will be held in odd years, alternating with the established IDEM Singapore, the leading dental exhibition and conference in the Asia Pacific. In contrast to IDEM Singapore, which is positioned as a regional event catering to the entire Southeast Asian market, the Indonesia Dental Exhibition & Conference will clearly prioritize the needs of the Indonesian dental industry and dentists. It will offer an extensive trade exhibition and educational program, tailored to meet the demands of the larger Indonesian dental community. The Indonesia Dental Exhibition and Conference will complement this offering by serving as an extension of IDEM Singapore into the largest and fastest growing dental market in the region, Indonesia. It will feature regional localized educational content and offer a platform to manufacturers intending to penetrate deeper into the emerging Indonesian market.
