#### About the expo

Security market has been significantly growing over the last decade not only in Tunisia and Africa but also all over the world. Despite the effects of the world economy recession, the security industry has been benefiting from a healthy growth triggered mainly by: The increasing consumer demand for security products and solutions - The evolution of security technologies - The extension of security solutions to system integrations. In order to bring closer manufacturers, distributors, system integrators, installers and consumers, the CTFEXPO in collaboration with the Tunisian Security Trade Association CSENSE organizes the International Security Exhibition SECURITY EXPO North Africa. An entire show will be dedicated for professionals to display the latest products, solutions, services and technologies both in security and health and safety.
