#### About the expo

Up-to-date knowledge about fire protection systems, structural and organizational fire protection and security will be presented at the renowned VdS-FireSafety Cologne. The event comprises: seven renowned specialist conferences - a large, international fire protection exhibition, where exhibition visitors as well as all conference participants can gain an overview of industry offerings and exchange ideas with the suppliers - thematic forums within the exhibition hall, open to all visitors: the "Future-Forum for Fire Protection" and the "Science and Exhibitor forums". This year's trade fair at VdS-FireSafety, too, will once again attract a multitude of international exhibitors and visitors. We would love to welcome you among them! The specialist conference and symposia classics of VdS-FireSafety Cologne are of course not to be missed. Parallel to the specialist conferences and symposia, current products and solutions for fire protection systems, structural and organizational fire protection will be presented at the large, international trade fair, in many cases including product demos and spectacular experimental presentations. Here, trade fair visitors and all conference participants can gain an overview of innovative industry offerings and exchange ideas with the suppliers.
