USA  
America

---

#### About the expo

The Connected Security Expo is the only event where you can experience physical security from an IT security lens. Join cyber and physical security leaders from across industries to explore how physical security can help mitigate cyber threats and bridge the gap between security and IoT. Go beyond the traditional tradeshow layout and experience a highly interactive exhibit hall format built to immerse you in emerging security-tech in a high-touch format. With Cloud, Bring Your Own Device (BYOD) and now Internet of Things (IoT) strategies continuing to take shape, logical and physical security leaders from almost every industry are being challenged to keep pace and secure their critical data, people, physical assets and supply chains across a more connected world.
