deka messebau GmbH

Staging brands - in space.

Consulting - Planning - Implementation.

For 38 years we have been operating successfully on the market as an exhibition stand construction specialist: individual construction is our strength... and our passion. From architectural design to implementation and logistics, deka messebau offers you everything from a single source.

Today, 40 permanently employed experts are responsible for these tasks: this is how exhibition stands from 12 to 1200 square metres are created. Always oriented towards the trade fair and marketing goals of our customers!

Experience, short distances and efficient processes are the keys to successful trade fair projects: At deka messebau you receive all the services you need for the creative, targeted and efficient development and implementation of your trade fair stand from a single source!

Our trade fair stand architects and designers, marketing specialists and project managers, as well as all technicians, craftsmen, warehousemen and logisticians, work towards one goal: to make your trade fair appearance a complete success. Promised!

Successful projects are the result of dialogue:
